

*3<sup>rd</sup> International Oil Shale  
Conference*

*(BAU-OSC-3)  
October 17–19, 2023*

Al-Balqa Applied University

The Al-Balqa Applied University in Jordan is planning to organize its 3rd International Oil Shale Conference (BAU-OSC-3) **from 17 to 19 October 2023 in Jordan**. The Conference was deferred from being organized in 2021 due to the pandemic, COVID-19.

Since then, no conferences or workshops have been organized solely on oil shale research advancement and updates. This Conference would provide a platform for researchers, technologists, businessmen and decision-makers to meet in one place.

The Conference will cover recent trends in oil shale research and application and a wide range of topics in oil shale knowledge, in addition to other related subjects such as:

- Oil Shale Processing
- Oil Shale and Shale Oil Properties
- Chemistry and Geochemistry
- Geology and Stratigraphy
- Modeling and Catalysis
- Chemicals from Shale Oil
- Shale Oil Upgrading
- Combustion and Environmental Impact
- Advances in Oil Shale Retorting Technologies
- Mining and Mining Technologies
- Oil Shale, Semicoke and Ash Valorization
- Socioeconomic Impact and Policy
- Resource Evaluation
- Assessment of Oil Shale Options
- Groundwater Control and Management
- Health and Environmental Risk
- Economics and Finance

The Conference website is <https://www.bau.edu.jo/conf/oilshale/Home.html> on which the important information regarding topics, relevant dates, fees, visa requirements, etc., is provided. For any additional information, the researcher may write directly to the Chairman of the Conference through the Conference email: [bau.oilshaleconf@bau.edu.jo](mailto:bau.oilshaleconf@bau.edu.jo)

Omar Al-Ayed  
Professor and Chairman
